Call-ups via crossresults.com

Getting tightened up with more events, better sorting. Remove upgraded riders. Great feedback from Tim Madden.

6:40 Registration Improvement Update

Update – Yvonne and Chris. Doug staff extra person as registrar. Need radio from Doug to day-of reg people. Yvonne, please communicate with promoters.

Same old problem on cross days – day of registration too late, especially juniors.

For 2012 – (pending timing system performance during cross season). Special committee will be called if this is the case. Keith, Yvonne, Tim Madden, Dean, Clint, Doug input.

6:50 Timing System Update - Chris

Battery Power – huge improvement. System producing results at Bear Creek TT.

Cross Event Testing – good testing in September, even with a finish on grass.

Cross Cup #1 - Good to go, will produce preliminary results from system, will produce split times for publication on ACA website (this is goal). No chip, no result! 30 minutes reg closes before race start.

Chip Checking – Yvonne big effort last 4 weeks

Chip Placement on Bike – this has got to get better. Need a paid checker.
